

The new way to record waste transfers

Edoc teams up with Helistrat to help businesses address their waste strategy targets

The edoc team is teaming up with Helistrat to run a seminar at the Facilities Show to help businesses address their waste strategy targets. The seminar will take place in the networking area at 12noon on Wednesday 18 June. For more information click [here](#).

Businesses at Energy & Environment Expo are invited to attend exclusive seminar on how technology can reduce costs in waste management

The Environment Agency is also holding a seminar for delegates at Energy & Environment Expo to introduce edoc (electronic duty of care). The seminar will introduce the innovative new online technology for recording the movement of commercial and industrial waste, while highlighting how edoc can help to reduce costs in waste management.

To register to attend the edoc seminar click [here](#).

Waste 14

Brian Marshall, environmental manager and auditor at Reconomy, who are currently in the process of switching over to edoc, will be presenting on behalf of edoc at Waste 14 in Manchester on Thursday 3 July. The one-day event which is being organised by Skip Hire Magazine will showcase some of the best names in the waste sector. Brian will be talking about edoc and the benefits of adopting the innovative new online system for recording and managing waste transfers between organisations.

For more information on edoc and how it can benefit your business click [here](#).

New edoc Technical Advisory Group Do you want to get involved with edoc?

We're setting up a new forum for edoc users. This new group will look at users' experiences, share their learning and be a sounding board for future development of the system.

If you're interested and want to be part of the new forum, tell us why you should be involved. Click [here](#) for more information.

With the contribution of the LIFE financial instrument of the European Community.
